

Reference list – Exponential Random Graph Models

Foundational papers on exponential random graph models

- Besag, J. (1974). Spatial interaction and the statistical analysis of lattice systems. *Journal of the Royal Statistical Society, Series B*, 36, 96-127.
- Erdős, P., & Renyi, A. (1959). On random graphs. I. *Publicationes Mathematicae (Debrecen)*, 6, 290-297.
- Frank, O. (1981). A survey of statistical methods for graph analysis. Pp. 110-155 in S. Leinhardt (Ed.), *Sociological methodology 1981*. San Francisco: Jossey-Bass.
- Frank, O. (1991). Statistical analysis of change in networks. *Statistica Neerlandica*, 95, 283-293.
- Frank, O., & Nowicki, K. (1993). Exploratory statistical analysis of networks. In J. Gimbel, J.W. Kennedy & L.V. Quintas (Eds.), *Quo Vadis, Graph Theory? Annals of Discrete Mathematics*, 55, 349-366.
- Frank, O., & Strauss, D. (1986). Markov graphs. *Journal of the American Statistical Association*, 81, 832-842.
- Holland, P.W., & Leinhardt, S. (1981). An exponential family of probability distributions for directed graphs (with discussion). *Journal of the American Statistical Association*, 76, 33-65.
- Strauss, D. (1986). On a general class of models for interaction. *SIAM Review*, 28, 513-527.
- Strauss, D., & Ikeda, (1990). Pseudo-likelihood estimation for social networks. *Journal of the American Statistical Association*, 85, 204-212.
- Wasserman, S., & Pattison, P. E. (1996). Logit models and logistic regressions for social networks: I. An introduction to Markov graphs and p^* . *Psychometrika*, 61, 401-425.

Papers relating to new specifications for exponential random graph models

New specifications

- Hunter, D. & Handcock, M. (2004). Inference in curved exponential family models for networks. Penn State Department of Statistics Technical Report 0402.
- Pattison, P. E., & Robins, G. L. (2002). Neighborhood-based models for social networks. *Sociological Methodology*. 32, 301-337.
- Robins, G.L., Snijders, T.A.B., & Wang, P. (2005). Recent developments in exponential random graph (p^*) models for social networks. (<http://www.psych.unimelb.edu.au/staff/robins.html>)
- Snijders, T.A.B., Pattison, P., Robins, G.L., & Handcock, M. (2005). New specifications for exponential random graph models. *Sociological Methodology*. (http://stat.gamma.rug.nl/snijders/sprh_f.pdf)

Degeneracy and related issues

- Handcock, M.S. (2002). Statistical models for social networks: Degeneracy and inference. In Breiger, R., Carley, K., & Pattison, P. (eds.). *Dynamic social network modeling and analysis* (pp. 229-240). Washington DC: National Academies Press.
- Handcock, M.S. (2003). *Assessing degeneracy in statistical models of social networks*. Center for Statistics and the Social Sciences, Working Paper no 39.
- Häggström, O., & Jonasson, J. (1999). Phase transition in the random triangle model. *Journal of Applied Probability*, 30, 1101-1115.
- Park, J., & Newman, M. (2004). Solution of the 2-star model of a network. *Condensed Matter abstracts*, cond-mat/0405457.
- Robins, G.L., Pattison, P.E., & Woolcock, J. (2005). Social networks and small worlds. *American Journal of Sociology*.
- Snijders, T.A.B. (2002). Markov chain Monte Carlo estimation of exponential random graph models. *Journal of Social Structure*, 3, 2.

Maximum Likelihood Estimation

- Boer, P., Huisman, M., Snijders, T.A.B., & Zeggelink, E. (2003). *StOCNET: an open software system for the advanced analysis of social networks*. Groningen: ProGAMMA/ICS.
- Corander, J., Dahmström, K., & Dahmström, P. (2002). Maximum likelihood estimation for exponential random graph models. In J. Hagberg (Ed.), *Contributions to social network analysis, information theory and other topics in statistics: A festschrift in honour of Ove Frank*. Stockholm: Department of Statistics, University of Stockholm.

- Crouch, B., & Wasserman, S. (1998). Fitting p^* : Monte Carlo maximum likelihood estimation. Paper presented at International Conference on Social Networks, Sitges, Spain, May 28-31.
